

# Cowealth TPMS Wireless Tire Pressure Monitoring System

We keep you informed while you're

# On the roll!

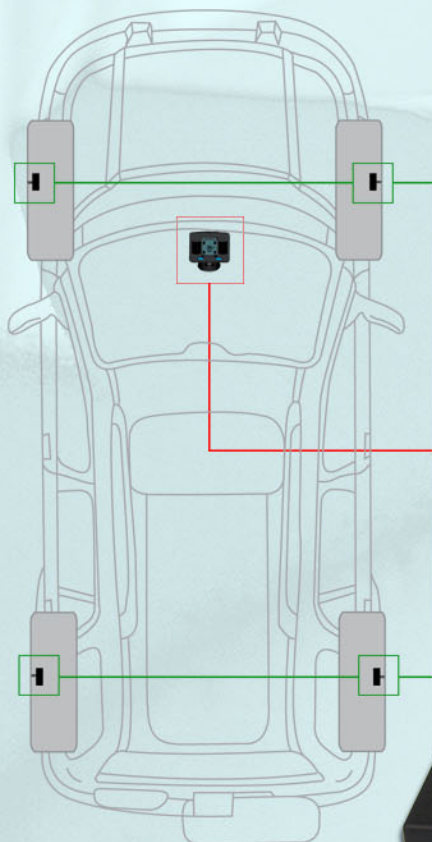

## Features:

- Easy installation
- 5-year battery life (Sensor)
- Simple tire position calibration
- Patented battery saving feature
- Real-time display of all tires condition
- Detect temperature and pressure at once
- Under / Over preset pressure audible warning signal
- Industry-leading pressure detection range: 10 to 150 PSI
- 2-24 wheels versions are available for vehicles of all types
- Compatible with more than 90% rims and tires in the market

## Install the sensor

- Sensor is installed onto the inflation plug inside the rim. The sensor will detect tire pressure and temperature, and transmit information to the display monitor.
